

Sabarivasan Sankar

Full stack developer

Mid-level **engineer** with 3+ years of experience building secure, scalable full-stack applications using React, **TypeScript**, **Node.js**, and **PostgreSQL**. Leverages a unique background in billing, inventory, and payment handling to deliver creative problem-solving, performance optimization, and highly reliable web systems.

Professional Experience

Rently Software Development

Coimbatore

Software Engineer (Mid-Level)

March 2026 – Present

- Architected and implemented a highly granular, role- and permission-based access control (RBAC) authentication system to secure sensitive enterprise workflows.
- Optimized full-stack architecture to enhance web application performance, reliability, and security compliance.
- Collaborated on cross-functional system design, leveraging a deep understanding of complex business logic and performance tuning.

Associate Software Engineer

July 2024 – March 2026

- Developed and managed core enterprise modules for invoicing, billing, and automated inventory systems.
- Integrated **Cybersource** payment gateway infrastructure to securely process one-time client payments and reliable, automated scheduled billing cycles.
- Engineered robust data pipelines to synchronize and transfer high-volume data across multiple disparate systems using **Apache Kafka**, **REST API**, and **Celigo**.

Intern Developer

March 2023 – July 2024

- Built and maintained backend RESTful APIs from scratch using **Node.js**, **Express**, and **PostgreSQL**.
- Designed and implemented user-friendly frontend UI dashboards in **React** to perform seamless CRUD operations on internal administration portals.
- Collaborated closely with senior engineers to write clean, maintainable code and write foundational database schemas.

Competence

Full-Stack Architecture • RESTful API Design • Payment Gateway Integration

- Automated Billing Systems • Database Optimization & Indexing •
Role-Based Access Control (RBAC) • Data Pipeline Engineering • Change
Data Capture (CDC) • Microservices • Software Security Compliance • Agile
Methodologies • Systems Integration • CI/CD Pipelines • Cloud Infrastructure
• Unit & Integration Testing • Performance Tuning • State Management •
Distributed Systems
